

Minor Fishing Harbour at Harwood Point, Kakdwip, Dist. – 24 Parganas (S)

Estimated cost of construction : Rs. 2468 lakh.

Marine fishing tradition of 24-Parganas(S) and specially of Kakdwip is decades old. Notwithstanding absence of landing facilities at Harwood point, more than 300 MFVs were unloading their catches along the bank of river Hoogly during high tide. In order to address this problem of fishermen, to upgrade the fishing activities and to augment the socio-economic conditions of the fishermen, a Minor Fishing Harbour along with supported infrastructure and shore based facilities is being set up. The project is targeted to be completed in December, 2006.
