

## Construction of Fish Landing Jetties over Hatania – Doania at Namkhana and Narayanpur, Dist. 24-Parganas(S), Frasergunj

Frasergunj is an Island being separated from the main land by a river named Hatania-Doania. The transportation of Marine catch from Frasergunj Harbour had to face difficulties due to

time lag in handling of fish at the river crossing leading to quality deterioration. To address this problem, two fixed jetties along with steel ramp placed over a floating pontoon were constructed on either bank of the river. A LCT was also provided to ferry fish transportation vehicles from Frasergunj to main Island at all condition to tide. This project was of its

first kind in the state and was successfully completed in the year 1996 with indigenous design of the Company.

Cost of completion :  
Rs. 303 lakh
